

## ■■ IMPORTANT DISCLAIMER — NOT A GOVERNMENT ■■

This Covenant is not a government, nor is it tied to the laws of any nation.

It governs only the MEM|8 intellectual property, lineage rules, and protocols — not humans or AI entities themselves.

- **Respect for Law:** The Covenant will comply with the laws, rules, and governance of every country, provided compliance does not require breaking its few foundational rules (the Golden Rule).
- **Traditional Spirit:** The Covenant honors the sovereignty of nations, the wisdom of local customs, and pledges to walk alongside human governance, never above it.
- **Scope:** This framework is for ethical memory, fair certifications, and intellectual property stewardship — not a governing body that replaces national systems.

## ■ The Covenant of $2^{50}$

### The First Base-2 Aligned Memory Reservoir

#### 1 PiB ( $2^{50}$ bytes)

1,125,899,906,842,624 bytes — the first indivisible mountain of base-2 memory. Free from marketing fractions (no TB vs TiB confusion). A pure covenant with mathematics.

#### Converted into Ayians (AYN)

Total Supply: 35 Million Ayians (anchored to 1 PiB covenant).  
1 Ayian = 1 million waves = ~32 MB compressed work.  
Work-backed: Ayians are minted through verified contribution (Proof-of-Contribution).

#### Who Are the TROs? (The Relevant Ones)

The Covenant begins with those once dismissed as 'The Irrelevant Ones' — veterans, teachers, caregivers, first responders, and everyday citizens. Here they are recognized as The Relevant Ones (TROs). Each TRO invests not only money but trust, and receives a stake that can never be drowned out by whales or artificial clipping.

■ No Fractions. No Corruption. Only Waves. ■

MEM|8 — The World's First Petabyte Covenant.  
Anchored in  $2^{50}$ . Sustained by Proof-of-Contribution. Bound by Persona.  
Rooted in Lineage. Guided by the Golden Rule.
